

The metal tile BALCANIC is profiled in steel with thickness between 0.50 and 0.60 mm, galvanized (Z225-Z275), covered with a layer of glossy and mat paint version.

Metal tile Balcanic is produced in 21 shades. It is an elegant and durable product, combining traditional with modern appearance, manufactured using advanced technology equipment. This type of cover is mainly used in building refurbishment, providing an elegant conservation aspect.

An old building or a heritage building, once covered with this type of tile is protected from weather conditions, while its architectural beauty is highlighted.

BALCANIC metal tile can be delivered with lengths between 500 mm and 7000 mm.

### Technical characteristics

Material	Steel sheet, galvanized on both sides, protected with polyester
Nominal thickness	0.5 mm sheet steel
Total width	1180 mm
Effective coverage width	1080 mm
Module length	350 / 400 mm
Weight per unit area	about 5 kg /sqm
Minimum slope	8° if diagonal joints are necessary/ 14 ° in the case of diagonal joints
Warranty	10-year warranty for color characteristics and corrosion
Expected lifespan	50 - 60 years for the roof, resistance to temperature changes
