

The metal tile CLASIC is profiled in steel with thickness between 0.50 and 0.60 mm, zinc-coated (Z225-Z275), covered with a layer of glossy or dull type paint.

This type of metal roofing is the most widely used, similar with classical tiles and is used especially in residential buildings. The CLASIC metal tile is produced in 21 colors glossy and dull.

Metal roofing panels are available in lengths between 500 mm and 7000 mm. For long waterline lengths, where covering with a single tile panel is not recommended, two or more metal roofing panels must be used. This provides calculation of the bottom panels as a multiple of tiles, taking into account the technical overlap of 150 mm

**Technical characteristics**

Material	Steel sheet, galvanized on both sides, protected with polyester
Rated thickness	0,5 - 0,6 mm
Total width	1200 mm
Effective coverage width	1120 mm
Module length	350 / 400 mm
Weight	about 5 kg /sqm
Minimum slope	8° if diagonal joints are necessary/ 14 ° in the case of diagonal joints
Guarantees	10-year warranty for color characteristics and corrosion
Expected lifespan	50 - 60 years for the roof, resistance to temperature changes
