

Product description

BILKA T135 corrugated steel sheet is used for industrial constructions, especially for those requiring large openings. The corrugation height is 135 mm, the distance between corrugations 40 mm and corrugation opening 270 mm.

Production Specifications

- BILKA T135 corrugated steel is made with a nominal thickness between 0.75 - 2.5 mm, based on the construction requirements
- The standard length of the modules ranges from 0.500 m and 13.5 m. Execution of the modules with different lengths from the standard ones will be made after prior consultation with the technical specialist from BILKA.
- corrugated sheet modules are manufactured at a nominal width of 964 mm
- BILKA produces corrugated steel sheet T135 in 13 color, glossy options

Technical Specifications

Material	Steel, galvanized sheet metal on both sides protected with polyester
Nominal thickness	0,75 - 2,5 mm
Total width	964 mm
Covering useful width	930 mm
Height of the corrugation	135 mm
Weight on the surface	9,70 - 15 kg/sqm
Guarantee	10 year warranty for color characteristics and corrosion
Endurance	50 - 60 years, resistance to temperature variations
