

Product description

T45 BILKA corrugated sheet metal is manufactured in steel sheet, galvanized on both sides and protected with polyester. It is used for small inclination roofs and intermediate floors.

It is the ideal and economic solution for construction and rehabilitation of facilities intended for: warehouses, shopping centers, production facilities, farms, silos, stables, sports centers etc.

Production Specifications

- BILKA T45 corrugated sheet metal is made with a nominal thickness between 0.4 - 1.50 mm, based on the construction requirements
- the standard length of the modules ranges from 0.500 m and 13.5 m. Execution of the modules with different lengths from the standard ones will be made after prior consultation with the technical specialist BILKA.
- corrugated sheet modules are manufactured at a nominal width of 1,040 mm
- BILKA produces corrugated steel sheet in 21 color, mat and glossy options

Technical Specifications

Material	Steel, galvanized sheet metal on both sides protected with polyester
Nominal thickness	0,4 - 1,50 mm
Total width	1040 mm
Covering useful width	1000 ± 5 mm
Height of the corrugation	45 mm
Weight on the surface	3 - 12,5 kg/sqm
Guarantees	10 year warranty for color characteristics and corrosion
Endurance	50 - 60 years, resistance to temperature variations
