

### Product description

The corrugated metal sheet T85 is especially used in constructions of industrial used (warehouses, industrial, commercial constructions etc). It is used as a support for terrace roofs inclined up to 5°, in combination with insulation and final roofing products. The corrugated metal sheet T85 is used by builders and for the intermediate floors in multi-level buildings. The height of the corrugation is 85 mm

### Production Specifications

- BILKA T85 corrugated sheet metal is made with a nominal thickness between 0.75 - 1.25 mm, based on the construction requirements
- The standard length of the modules ranges from 0.500 m and 13.5 m. Execution of the modules with different lengths from the standard ones will be made after prior consultation with the technical specialist from BILKA.
- corrugated sheet modules are manufactured at a total width of 1,130 mm
- BILKA produces corrugated sheet metal T85 in 13 color, glossy options

### Technical Specifications

Material	Steel, galvanized sheet metal on both sides protected with polyester
Nominal thickness	0,75 - 1,50 mm
Total width	1130 mm
Covering useful width	1090 mm
Height of the corrugation	85 mm
Weight on the surface	8,25 - 16,50 kg/sqm
Guarantee	10 year warranty for color characteristics and corrosion
Endurance	50 - 60 years, resistance to temperature variations
